Due to changes in DEQ regulations, all commercial residential or agricultural buildings being demolished must be inspected for asbestos prior to being delivered to the Bonneville County C & D Facility located at 395 E 33 N (just west of Bish's RV). Notification **MUST** be made at least two days prior to delivery by contacting Nancy Potter or Blair Hillam at 528-5550. Proof of asbestos inspection must be shown to the attendant at the Hatch Pit upon or before delivery. Failure to do so will result in the loads being refused and turned back until the paperwork is shown and verified. Bonneville County is not permitted to accept any refuse containing asbestos. Each load of demolition (containing no asbestos) will be charged \$20.00 each. Below are some agencies that perform asbestos inspections.

Thank you for your cooperation.
